Pinetrees, nr Ashford – Phase 1

Client: Private Client: Double Garage

Construction Details:

View this case study on WallerServices.com

The first phase of this project was commenced in June, 2000 when we built a new double garage block with a patio on top of it at a property in Hothfield, Nr Ashford, Kent.

Along with the main part of the works, we constructed a new brickwork boundary wall and carried out structural alterations to the main property including the installation of new oak framed windows. The works were completed in early 2001.

Since completing Phase 1, we have commenced the second phase which consists of the construction of a new two storey extension to the main property.
