School Kitchen Refurbishment

After suffering the heartache of seeing it destroyed by fire, we were asked to look at a possible fire damaged school kitchen refurbishment. The project's aim from the outset was to give the client both a working kitchen and a suitable area that can be used for teaching. In order to do this, we had to install new studwork and block work walls, electrics, plumbing, kitchen units, worktops, wall tiling, sinks, appliances and vinyl flooring. The area was also completely redecorated and new uPVC windows and an aluminium entrance door set were installed as part of the works.

We were very pleased to be able to complete this project within the timescale set and to the client's overall satisfaction.
