School Atrium Roof Light Glass Replacement

Waller Glazing Services carried out this school atrium roof light glass replacement project at a school in Gravesend, Kent. The original glass was single patent glazing and made the room below too hot in the summer and too cold in the winter. There was also a problem with glare from the sun and leaking when it rained. The existing glass was removed and new self draining glazing bars were installed along with solar double glazed units. This system provides an ambient tempreature throughout the year. The glass used also reduces glare from the sun and provides a fresh modern look to the atrium.

School Roofing Project

The building division was already carring out Tymberwood Academy's re-roofing project when the academy trust's senior architectural technologist requested we reglaze the glass atrium. We were happy to provide a quotation for these additional works. Please click on the following link to veiw our roofing project case study at Tymberwood Academy- https://wallerservices.com/casestudies/project-284-roofing-works/
