Ditton Junior School Window Installation

Following the successful installation of new windows and blue infill panels to one of the classroom blocks at Ditton Junior School, we were delighted to be invited back to continue the improvements.

The school had originally planned to replace all the windows across the buildings but, due to budget constraints, opted to complete the work in phases. With further investment now available, we returned to replace the windows in the two lower classrooms and an additional classroom block.

The project involved installing modern uPVC double-glazed windows and matching blue infill panels, creating a consistent and refreshed appearance across the school buildings.

As well as enhancing the overall look of the classrooms, the new windows will help improve thermal efficiency, reduce heat loss and lower heating costs. They also provide improved security and a more comfortable learning environment for pupils and staff.

In addition, we installed two exterior steel doors. The colours matched the window infill panels.

We're proud to have continued our partnership with Ditton Junior School, helping them make practical, long-term improvements to their facilities in line with their budget and priorities.
