Pinetrees nr Ashford – Phase 2

Client: Private Client: Large Extension

Construction Details:

View this case study on WallerServices.com

Due to the extremely good working relationship we have with the client and the competitive tender we produced, we were awarded the next phase of works at this luxurious property. The works entailed a huge two storey extension with a bespoke oak staircase, porch and exposed trusses in the master bedroom.

The most difficult part of the project was the knock through where the extension met the main building. The existing property had to be propped up whilst a 7m wide hole was formed up to the roof line in the external wall. This then had to be supported with numerous structural steels. All this whilst the property was occupied!

Building on trust... together
