Bungalow Double Glazing Installation

We carried out this bungalow double glazing installation in Sittingbourne. The owner of this 1920's property requested upgrading the aged aluminium double glazed windows and front door.- The property was suffering from heat loss and condensation. We advised A-rated uPVC, Argon gas filled, double glazed windows with internal Georgian Bars be installed. The transformation of the bungalow is incredible. The windows with additional openings have enhanced the character and practicality and have reduced heat loss dramatically. The client also had security concerns at night. This was due to having a ground floor opening bedroom. The solution to this was installing a 'tilt & turn' style window which allows the window to tilt, slightly, inwards and also opens completely if the owner should have to evacuate the property.

Waller Glazing Services

Waller Glazing services works include window repairs. This consists of double glazed units, window handle and hinges. We also carry out complete aluminium and uPVC window and door installations.-Furthermore we would be happy to price any maintenance or repairs. We stock a large range of fire and safety glass which we can cut to size while you wait.
