PROJECT 131: Camden Penthouse

Client: Logan Construction

Construction Details: Aluminium Doors, New Build, Patio Doors, Powder Coating, Roof Lights, Specialist Lifting Equipment

View this case study on WallerServices.com

We were asked to assist in the design and specification of a glazed curtain walling system to a luxury penthouse on a block of flats that were being refurbished.

Approximately 80% of the perimeter walls of the penthouse were to be glazed to ensure panoramic views across London.

Due to the location of the works logistics were extremely difficult and involved the organisation of specialist lifting equipment.

Building on trust... together
