View this case study on WallerServices.com

Leaded Light Double Glazing Window Installation

Wealler Glazing carried out this leaded light double glazing window installation locally. A private client in Stiingbourne, Kent wanted to upgrade their existing timber windows and doors to maintenance free uPVC. Along with providing quality A-rated windows we also installed a high security composite front door. As a special request a full height mirror was integrated within a uPVC door.

The client was extremely pleased with the results as the works were carried out quickly, with little disruption and has given their property the look and finish that they desired.

Waller Glazing Services

Waller Glazing services works include window repairs. This consists of double glazed units, window handle and hinges. We also carry out complete aluminium and uPVC window and door installations.-Furthermore we would be happy to price any maintenance or repairs. We stock a large range of fire and safety glass which we can cut to size while you wait.
