PROJECT 157: NHS Gillingham Business Park

Client: NHS

Programme: 3 Days

Construction Details: Aluminium Windows, Repairs, Replacement Hinges and Handles, Tilt and Turn Windows, Window Servicing

View this case study on WallerServices.com

The main building contractor on this project had trouble finding a company with window servicing expertise and with only five days to go before the centre was to open, we were contacted and immediately offered to assist.

Firstly we surveyed the tilt and turn windows, 76 in total, and by using our vast stock and expertise we could then source any additional parts required to repair the windows.

Work started on the Wednesday and was completed by Friday, a total of three days from start to finish.

Each window was adjusted and serviced resulting in them becoming fully operational once again

Building on trust... together
