New Downstairs Cloakroom

A lovely couple in their senior years had the vision of -an additional new downstairs cloakroom to their property. They contacted us to see if it was possible. Following a survey to investigate the feasibility of the project, drawings were produced to finalise the design and a programme of works. The project involved the installation of a new cloakroom suite and by utilising the space available a utility area was also created. Additionally all pipework and supplies were boxed in along with access panels matching the newly installed kitchen units.

On completion they said that they wished they had done the work years ago as it has made such a difference to their home.

Waller Building Services

Established in 1993, Waller Building Services has been growing ever since. We regularly work in the residential and commercial sectors. Clients include schools, local authorities and private customers.
