Flat Roof Replacement

Following the high winds and storms across the country in March, we were contacted by a small village school. They had suffered from some serious damage to the schools flat roof. Waller Building Services to provide a quotation for a flat roof replacement. The winds had removed the original roofing felt and a temporary repair was immediately carried out. Due to the extent of the damage and the condition of the roof, it was more cost effective to renew the whole roof. This entailed re-laying with 3 layer felt, replacing the old timber cladding with painted upvc. Additionally thre outdated roof lights were replaced with modern 3 ply polycarbonate roof domes.

The work was carried out over the school holidays and the school now have a watertight roof which will last for many years to come.

Waller Building Services in Schools

In the last five years, Waller Building has worked in over 125 schools. Our reputation in the education sector is growing fast.
