Primary School Automated Entrance Gates Installation

Regis Manor Primary School automated entrance gates installation was a project we were particularly proud of. The client wanted to redesign their main school entrance to provide safe and secure access for children, staff and visitors. Working closely with key staff members, a design was agreed and the improvement works were carried out. We incorporated the school holidays as a key time for the major construction works. We also worked closely with the school through term time. This meant that any disruptions were kept to a minimum.

The new entry system incorporates an intercom linked directly to the schools reception. This allows visitors to access the school grounds and the staff also have the facility to enter the school car park via scanning a key fob over the external access control panel.

The improvement works have provided the school with an entrance that represent the school's high standards and welcomes visitors with the school's name and crest on a bespoke hand crafted automated sliding gate.

Waller Building Services in Schools

In the last five years, Waller Building has worked in over 125 schools. Our reputation in the education sector is growing fast. The services we provide include smaller refurbishments through to extensions and new builds. Waller Building is a Fensa, Chas, Constructionline and Safecontractor approved company. We are also a Kent County Council approved contractor. All of our workmen are DBS checked. This means you can be assured that our staff are suitable to work in your school. You can also be confident that we are a company that is built on trust. If your school is planning any size of project, we would be delighted to provide you with a quotation. Furthermore we would be happy to price any maintenance or refurbishment works for you.

Building Services We Provide

We cover all of the building as well as glazing services that a school may need. This includes, toilet and kitchen refurbishments. We also install fencing, flooring and carry out complete new builds. Furthermore the glazing division carries out window repairs. We also install uPVC and aluminium windows and doors. View our case studies to see projects we have recently completed on our website.
