Additional School Fencing

Delce Infant School asked us to install additional school fencing. They also requested that we carry out improvement works. This was to areas that needed attention following an extension to the school some years ago. The original contractors had created several banked areas that now needed protection. The school wanted to utilize these currently unused spaces.

Three Areas Were Targeted for Attention

The school had concerns about the gradient of the bank running around the perimeter of the playground. They were concerned that is was unsafe. Our solution was to follow an existing look of another area of the school. Log rolls were placed around the perimeter of the playground along with adequate fencing to improve the safety, practicality and aesthetics.

We installed fencing from the main pedestrian entrance. This is to ensure that all of the children are within a safe environment. The new layout also provides a good impression to visitors.

The previously sloped nursery play area required tiring to allow the younger children to play and safely. By sectioning the area using log fencing we created a fort style affect. This provided a large flat area that can be fully utilized.

Waller Building Services in Schools

In the last five years, Waller Building has worked in over 125 schools. Our reputation in the education sector is growing fast. The services we provide include smaller refurbishments through to extensions and new builds. Waller Building is a Fensa, Chas, Constructionline and Safecontractor approved company.
