PROJECT 193: Extension and Alterations to Hospice – Aylesford

Client: The Heart of Kent Hospice

Programme: 30 weeks overall

Construction Details: Brickwork, Carpentry, Decorating, Electrical Works, Floor finishes, Ground Works, Plastering, Plumbing, Roofing, Screeding, Structural alterations, UPVC glazing

View this case study on WallerServices.com

The works entailed demolishing sections of the existing building and extending outwards to enable the two new bedrooms to be created and converting an existing ward into a further bedroom and lobby.

The extension consisted of building cavity brickwork walls on a block and beam floor with structural steelwork installed to support the existing elevations.

The wet rooms were fitted out to give them a contemporary feel and the works were completed to a very high standard leaving the client extremely pleased with the end result

Building on trust... together
