New School Fencing

The school basketball courts were previously enclosed with 9ft high galvanised welded metal mesh fencing. Unfortunately the fence was showing signs of age. The school was concerned that the fence could be be a health and safety risk. The answer was new school fencing. We quoted to remove the welded metal mesh fencing completely and replace it with 3 metre 'Protek twin-wire 868'. This fencing is made with 8 & 6mm wires. This means that it is very versatile and stronger than other fencing on the market. It's high rebound properties and height also make it ideal for use around sports enclosures.

Waller Building Services in Schools

In the last five years, Waller Building has worked in over 125 schools. Our reputation in the education sector is growing fast. The services we provide include smaller refurbishments through to extensions and new builds. Waller Building is a Fensa, Chas, Constructionline and Safecontractor approved company. We are also a Kent County Council approved contractor. All of our workmen are DBS checked. This means you can be assured that our staff are suitable to work in your school. You can also be confident that we are a company that is built on trust. If your school is planning any size of project, we would be delighted to provide you with a quotation. Furthermore we would be happy to price any maintenance or refurbishment works for you.

Building Services We Provide

We cover all of the building as well as glazing services that a school may need. This includes, toilet and kitchen refurbishments. We also install fencing, flooring and carry out complete new builds. Furthermore the glazing division carries out window repairs. We also install uPVC and aluminium windows and doors. View our case studies to see projects we have recently completed on our website.
