Fire Protection Upgrading

We had worked with Regis Manor Primary School on previous projects. They asked us to carry out fire protection upgrading in areas of the school. We were happy to undertake these improvement works which was a result of a visit from the fire officer. The fire safety officer deemed actions needed to be made towards the school's fire protection. This was mainly around the fire exit routes, an area where the children previously hung their coats and bags. When the fire protection alterations were carried out, the school wanted to make use of the areas created and turn them into small intervention rooms. We worked closely with building control to ensure we had produced the correct documentation and workmanship to gain building control approval.

The works included creating new fire lined partitions to provide adequate protection to the fire exit route. All areas were decorated and had new floor coverings to enhance the project further. The school were really happy with the outcome of the completed works. This was because of the level of fire safety that had been upgraded. Consequently the school have gained valuable space.

Waller Building Services in Schools

In the last five years, Waller Building has worked in over 125 schools. Our reputation in the education sector is growing fast. The services we provide include smaller refurbishments through to extensions and new builds. Waller Building is a Fensa, Chas, Constructionline and Safecontractor approved company.
