Automated School Gate Installation

A small village school required a section of its existing fencing and the main gate to be replaced. The main part of this was project was the automated school gate installation. Additionally the fencing needed to be in a style to complement the schools village surroundings. A bespoke gate and fencing was manufactured. Access control was installed to allow the new gate to be opened via remote control. This means the security of the new boundary without the inconvenience associated with a manually operated gate. This was a great benefit to the office staff.

Waller Building Services in Schools

In the last five years, Waller Building has worked in over 125 schools. Our reputation in the education sector is growing fast. The services we provide include smaller refurbishments through to extensions and new builds. Waller Building is a Fensa, Chas, Constructionline and Safecontractor approved company. We are also a Kent County Council approved contractor. All of our workmen are DBS checked. This means you can be assured that our staff are suitable to work in your school. You can also be confident that we are a company that is built on trust. If your school is planning any size of project, we would be delighted to provide you with a quotation. Furthermore we would be happy to price any maintenance or refurbishment works for you.

Building Services We Provide

We cover all of the building as well as glazing services that a school may need. This includes, toilet and kitchen refurbishments. We also install fencing, flooring and carry out complete new builds. Furthermore the glazing division carries out window repairs. We also install uPVC and aluminium windows and doors. View our case studies to see projects we have recently completed on our website.
