Education Reception, Coffee Shop, Catering Kitchen

This project included the following, an education reception, coffee shop, catering kitchen, ICT suite and classrooms. Waller Building successfully won a closed tender for the conversion of an industrial unit. The conversion was to incorporated a fully functioning post 16 college. We worked closely with the appointed architect and the client. This allowed us to deliver a building that was specifically to their needs.-We knew that the deadline of 3 months was going to be tight. However we were confident that we could complete the works. This was due to our knowledge and expertise in this area.-

Reception Area-

A bespoke reception desk, disabled toilet and fire rated glass partitions were installed. As a result making a light and open space.

Coffee Shop

In assisting in the training of students, a catering coffee shop area was created. -The coffee shop is planned to be opened to the public when the students are competent in using the equipment. This is inline with their progression and training. -

Catering Kitchen - –

The kitchen was fitted out with high spec commercial equipment. This allows students to benefit from using the same equipment found in professional restaurants and catering facilities. In addition, large stainless steel extraction hood was manufactured solely for this project. This included, a fresh air ventilation system that provides the circulation of fresh air that the room requires.

I.T. Suites and Classrooms –

The rooms were created to enable learning spaces for theory instruction as well as learning.

This was a great project to work on. Both the client and ourselves were extremely happy with the end result.
