Testimonial

""Wallers have provided us with an excellent service throughout the project. Although the new windows were installed during the Academies term time, they were completed, on time and on budget"

Colin Bridges - Wilshere-Dacre Junior Academy"
- **(School Business Manager)**

Aluminium Window/Door Installation

Wilshere-Dacre Junior Academy commissioned Waller Glazing to carry out the aluminium window/door installation. We upgraded the existing wooden framed, single glazed windows. The new specification was aluminium, double glazed windows with Georgian bars to match the existing windows. This would then be passed by building control. Solar film was also applied to the glass. This reduces sun glare and additional heat gain during the summer months. The works were carried out during term time, and by working closely with the school staff, ensured minimal disruption to the school day. The teaching staff have already noticed a reduction of traffic noise from the main road directly outside the school. They are extremely pleased with the finished result.

Waller Glazing Services in Schools

In the last five years, Waller Services has worked in over 125 schools. Our reputation in the education sector is growing fast. The glazing services we provide include window and glass repairs. We also install aluminium and uPVC windows and doors. Waller Glazing is a Fensa, Chas, Constructionline and Safecontractor approved company. We are also Kent County Council approved. All of our workmen have been DBS checked. This means you can be assured that our staff are suitable to work in your school. You can be confident that we are a company that is built on trust. If your school is planning a glazing project, we would be delighted to provide you with a quote.

Waller Building Services in Schools

Waller Building Services also works with many schools. Our building services include smaller refurbishments through to extensions and new builds. Examples of our work in the education sector can be seen on this website.
