Aluminium Shopfront Installations

Waller Glazing Services were successfully appointed by a large building contractor. The project was to carry out four aluminium shopfront installations. This was for the forthcoming Starbucks Coffeehouse at the Chatham Dockside. Based in Kent, this shopping complex has strict appearance guidelines. Consequently we had to install grey aluminium framed shop fronts that matched the existing units. Therefore the frame profile and the colour. Starbucks is the latest addition to the increasing shopping area. Furthermore the new shop fronts included two electronically operated aluminium doors. Another key point was that each elevation contained 8.8mm laminated safety glass. All of the works were completed on schedule. This was within the developers overall programme.

Commercial Glazing Services

Waller Glazing Services are expanding within the commercial area. We work regularly in the education, retail and health care sectors. Our projects include high street shop fronts, curtain walling in schools and office glazing. Additionally, we install windows in factories, hospitals and education. For more information please visit our website.

Commercial Building Services

As well as the glazing division, Waller Building Services carries out projects within the commercial sector. These works are also in the education, retail and healthcare sectors. Our services range from smaller refurbishments through to extensions and new builds. Please see our website case studies for more information.
