View this case study on WallerServices.com

Residential Window Installation

Waller Glazing Services was asked to carry out this residential window installation. We installed lead light uPVC double glazed windows to a private residential property in Gravesend. We also fitted a new composite front door with glass side panels. In addition, white composite cladding replaced the existing uPVC cladding. This had discoloured due to the elements over time. The project took two days to complete. The house has been transformed, not only in looks but also in increasing the energy efficiency of the property. Consequently the new double glazed windows mean that the heating costs are lowered. The composite door fitted adds security to the house with a multi-point locking system. Composite doors come in a range of colours and designs. Once fitted they are maintenance free.

Waller Glazing Services

Waller Glazing services works include window repairs. This consists of double glazed units, window handle and hinges. We also carry out complete aluminium and uPVC window and door installations.-Furthermore we would be happy to price any maintenance or repairs. We stock a large range of fire and safety glass which we can cut to size while you wait.
