Extension & Garage Conversion

An extension & garage conversion was the ideal solution for this client as they were looking to increase the ground floor space to their property. -The works entailed linking the garage to the main house and building an extension to the side of the garage to create a new dining room and kitchen. Furthermore within the extension was a new utility room with WC. -The works also included forming a larger lounge area which was achieved by removing the existing kitchen and toilet. The project transformed the property with the lounge flowing into the new extension. The client was over the moon with the final results.
