Academy Aluminium Window Installation

This academy aluminium window installation was challenging project and very different from a normal window installation. The school required replacement windows and new steel roof supports. Over time, the original supports were becoming ineffective. Each steel was specially manufactured, and support the roofs that were beginning to sag. New aluminium framed, double glazed windows were than installed. Additionally blue infill panels were fitted to match the existing school colours. -Special solar controlled double glazed units were than installed. This means that the temperature inside each classrooms and the gym will be cooler on hot sunny days.

Waller Glazing Services

In the last six years, Waller Building and Glazing has worked in over 135 schools. Our reputation in the education sector is growing fast. The glazing services we provide include smaller repairs through to completed UPVC and aluminium window and door installations.
