Primary School Perimeter Fencing

A local school requested that we carry out this primary school perimeter fencing project. With public woodlands bordering the rear of the school, it was essential that the area be secure. The existing fencing had broken down over the years. Initially an area of the woods had to be cleared to allow the new fencing to be installed. 300 metres of green powder coated fencing was installed around three sides of the school and, additionaly, we installed two secure entrance gates. This allowed access for areas of the woods that require constant maintenance. Additionally, the new boundary fencing provides secure protection for the school and it's pupils. As well as additional security, the whole area looks much more neater.
