School Glass Roof Replacement

Maidstone grammar needed a school glass roof replacement to one of their entrances. We were successful in winning this project which took two weeks.

The glazing bars used in this project are a high spec thermal bars manufacturered by Lonsdale Metals. These same bars have been used at Charing Cross railway station as well as in many London museums. Additionally we installed low E, self cleaning safety glass which has provided fantastic results. We were also able to re-use the existing lead which was a cost saving for the school. To fit the roof we used independant scaffolding, first to dismantle the existing roof and then to install the new glazing system.

For information on other building and glazing projects that we carry out in schools, please click on the following link-https://wallerservices.com/schools-education-clients/

Waller Building and Glazing Services

In the last six years, Waller Building has worked in over 135 schools. Our reputation in the education sector is growing fast. The building services we provide include smaller refurbishments through to extensions and new builds. Waller Building is a Fensa, Chas, Constructionline and Safecontractor registered. This means that our staff are suitable to work in schools. Furthermore we would be happy to price any maintenance or refurbishment works for your school.
