Primary School Kitchen Window Installation

This primary school kitchen window installation was needed as the school's kitchen windows had come to the end of their lifespan. The school requested that we replace the existing windows with new modern uPVC double glazed windows. Waller Glazing Services installed new tilt and turn windows which gives the correct amount of ventilation required for a kitchen. The new windows are much more accessible than the previous versions.

Installation Completed in One Week

The school requested that we replace the windows during the February half term holiday which consisted of a one week break. We ensured that the kitchen windows were installed within the week and before the kitchen staff and pupils returned back to school. As a result, no disturbance was caused to the school during the project. The result is fantastic looking windows with blue infill panels which have a U-value of 1.1. The windows have transfromed the look of the kitchen which now looks like a new building.
