New Kitchen Installation

After a previous project for a local domestic client, we were approached again to carry out this new kitchen installation project within the same property. The works involved refurbishment and reconfiguration of the kitchen. This included relocating the boiler, rewiring and plastering. Additionally, the new kitchen was installed, completely decorated and a new floor covering was laid. An existing doorway was also altered to accommodate a new uPVC double glazed window into the room. The client is extremely pleased with the results. We look forward to working with them again.
