Primary School Window Replacement

This primary school window replacement project was part of a successful tender bid procured from Medawy Council. The tender involved a complete window and door replacement programme for three schools in the Medway area.

In order to complete the project on time, it was decided that we would start the works at the first school before the summer holidays. We worked closely with St Helen's Primary School and produced a programme of works which included decanting classrooms as we progressed throughout the school building.- This was acheived with the use of great communication and input from the school staff. Frequent site meetings with Medway Council also ensured that the project was on schedule and to the standard that the client expected.

Windows and Doors

Double glazed, uPVC windows and infill panels were installed throughout the school which included curtain walling for the main hall. We also installed white, powder coated aluminium doors to integrate with the school's new windows and infill panels.

The successful completion of the intial project allowed us to remain on schedule. This meant that the second and third schools works could be carried out throughout the school summer holidays.
