## Girl's Grammar School Toilet Refurbishment

This girl's grammar school toilet refurbishment project entailed the modernisation of a toilet block. The main purpose for this was provide facilities for mixed use. The works consisted of completely stripping out the existing sanitary ware, flooring, tiling, fixtures and fittings. We then started to form six individual, self contained cubicles. Each cubicle had its own WC suite, wash hand basin and LED light fitting.

A new air extraction system was installed via the new rear duct panelling. Additionally, the services to the basin and hand dryer were concealed within the new stud walls to the cubicles. The entire area was redecorated with new vinyl flooring laid which included coved skirting.

The client was extremely pleased with the end result and the new facilities have been used by their 6th form students since the start of the new term.
