School Canteen Refurbishment

Waller Building Services carried out this school canteen refurbishment project during the school summer holidays. Over the last few years, St Columba's Catholic Boys' School has invested money on improving the environment for it's students. This summer the school's main canteen was the focus for improvement.

Two of the three areas of the canteen had been worked on in the past. However, the central area had become tired and required attention. The old suspended ceiling and the lighting were upgraded to modern standards. All areas were decorated to provided a bright and welcoming canteen.

To benefit the room further a dividing wall was removed, opening up the canteen even more. This allows for additional students to benefit from the new larger space.
