Bronte School Toilet Refurbishments

The Bronte School Toilet Refurbishments started with a challenge. Can one toilet become three? Well, with alot of work and having a close working relationship with the client, yes it can!

The school really needed additional toilet facilities for both students and staff. However, space was extremely limited. A second floor single toilet was the chosen area and after clever planning the project was agreed.

Walls were removed and new ones built. Two toilet areas were formed providing one staff and two student toilets. The design also included a water fountain complete with water bottle filler. This was installed in the landing outside of the toilets. As you can see from the images, the toilets look like they have always been there.
