Client: Medway Council - Hempstead Infant School, Hempstead, Gillingham, Kent

Construction Details: CHAS Registered, Safety Glass, School Improvements, Teleflex Window Winders, uPVC Windows

View this case study on WallerServices.com

Infant School Window Installation

This infant school window installation was the third of a local council tender which was completed in the summer holidays. The project began with asbestos removal by a licensed asbestos removal contractor. The asbestos was removed from high level external areas of some of the classrooms. Asbestos panels were then replaced with white insulated, uPVC cladding.

Waller Glazing Services replaced all of the windows throughout the school which have improved security, thermal efficiency and modernised the look of the buildings. The sports hall area was fitted with a Profile 22 curtain walling system and, in addition, teleflex window winders were installed to enable high level windows to be opened and closed remotely.

We replaced all of the school's doors with rubust-commercial Smart System aluminium doors.
