Wigmore Library Refurbishment

This Wigmore Library refurbishment project saw us tasked with revitalising a tired and dated building. Part of the internal works consisted of alterations to form a new meeting room and toilets for members of the public. This would help host future multi-functional events. The installation of a new heating system and LED lights will reduce the building's carbon footprint. This will also help lower future energy costs. Throughout the library re-decorating added a freshness. New vinyl flooring and carpet tiles were laid within the main areas of the facility. The addition of both static and mobile shelving completed the look internally. Additionally, a new lighter reception area with desk and upgraded I.T. facilities now greets members of the public as they enter.

New Aluminium Windows and Entrance

To create more space, the entrance was relocated to the centre of the building. New grey automated double doors were installed and, in addition, new commercial aluminium double glazed windows replaced the original single glazed windows. This will improve the library's energy efficiency which will mean lower future energy bills and a warmer environment in the colder months. In place of the original entrance, full length aluminium windows were installed providing a light and friendly area next to public facilities. To complete the look, each glass panel had colour filming applied which provides a funky new look. For more information on our commercial glazing click on the following link to our website-https://www.wallerservices.com/glazing/commercial/

The library now has the feel of a modern, light and spacious building where social groups can meet and research and educational study can take place.

Improved Staff Facilities

Finally, a specification of this project was to improve staff welfare which included complete refurbishment of the kitchenette and toilets.

For more examples of commercial works carried out by Waller Building and Glazing Services please click on the following link-https://wallerservices.com/commercial-clients/

Commercial Building

Commercial building is a growth area for Waller Building. We work in the education and healthcare sectors. The retail sector is also an area of growth. This is due to many warehouse developments in the south east. We install toilet and kitchen areas. We also install commercial window and doors. For examples of our services, take a look at our commercial glazing case studies.

Waller Building

In the last 25 years, Waller Building has worked on many commercial projects. Our reputation is growing fast. The services provided range from refurbishment through to extensions and complete new builds. Additionally our glazing department repairs windows and glass. We also install uPVC and aluminium windows and doors. One of the major areas that we are continuing grow is window replacement in schools. Waller Associates is Fensa, Chas, Constructionline and safecontractor approved. We would also be happy to give you a price for any refurbishment works.

Contact Waller Building

Based in Sittingbourne, Kent, we carry out works throughout the south east of England.-If you would like a quotation on any size of glazing projects, please contact us. Call 01795 424435 or email mark@wallerservices.com
