School's Nursery Refurbishments

Beaver Green Primary School's nursery refurbishments were undertaken in the school's original early years provision facility. The works incorporated transforming two small offices and a small tea point into one larger space. The main goal was to design one large area to create a toddler room which would have direct access to an outside facility. A new aluminium door and window was installed to create more light and improve access. Waller Building also created a larger kitchen which provides more space to prepare snacks and drinks. The new room recieved the full works which included a new suspended ceiling, flooring and decoration throughout. Additionally, we upgraded the original lighting to LED which brightens the room and is more energy efficient.

Toilet Refurbishment

The project also involved us refurbishing the original DDA toilets and creating toilets for the toddler room. Other smaller adaptations were completed and created an improved free flowing enviroment for the children and nursery teachers. The final result is a bright, safe and spaceous nursery that can be used for many years to come.
