Nursery Window Replacement

Waller Glazing Services carried out this nursery window replacement project during the school summer holidays. The concrete building was originally a Second World War air raid shelter. Now used as a nursery, there was a need to update the old Crittal windows. The nursery wanted to upgrade to uPVC, double glazed, windows. This would improve the look of the building, increase security and thermal efficiency.

Before works could be carried out, all of the window cills needed to be removed as they contained asbestos. They were removed safely by an approved registered contractor.

Works Schedule

Despite the works being carried out during the summer holidays, there were a small number of children attending the nursery. We worked closely with the nursery staff to create a schedule of works. This enabled staff to move classrooms daily to ensure that rooms were free for works to be undertaken. This meant that very little disruption was caused.

The final result was new secure windows that will save heating costs during the colder months.
