Primary School Canopy Installation

Waller Building Services carried out this primary school canopy installation within two days. The school wanted to create an additional exterior learning area that could be used all year round. Canopies are a cheaper, quick and easy option which utilise outdoor spaces.

Outdoor Learning Area

The government school inspectorate, Ofsted, view the opportunity for young children to learn in outdoor environments as essential. With the British weather being unpredictable, at best, canopies are a great solution. They create a safe area for early learning education and can add character to school buildings of any age. Offering shade in the summer and shelter during the wetter months, canopies provide an all year round versatility. Coming in a variety of colours and styles, there is a canopy for all types of buildings and installation is quick and easy.

School Colours

The school chose a vibrant blue canopy to match existing doors and window panels. By using the RAL number, the colour of the framework compliments other areas of the school. The style of the canopy also adds a funky look to the area of the school.

A new area has been created for young children to enjoy out side learning for years to come.
