Village School Toilet Refurbishment

A local village school required toilet refurbishment works. The school's previous year 1 and 2 toilet facilities consisted of two small separate toilet blocks. The boys and girls toilets were cramped and needed modernising. The school asked if it was possible to turn the two small sets of toilets into one larger open space. We designed an area that could be used as a unisex toilet, using cubicles and vanity unit only. Any urinals were to be removed.

Creating a Larger Space

The school liked our proposal and gave us the go ahead to carry out the works. We removed the wall that separated the boys and girls toilets. We also removed the front wall which included the original entrance doors. The removal of both walls created a larger area which allowed us to install more toilet cubicles than would have been previously possible. The improved size also meant that we could also install a central vanity unit consisting of four sinks. A new suspended with LED lighting panels was also installed.

The bright colours picked by the school added to the new toilets and gives the area a light and spacious feel.

Year R Toilet Refurbishment

In addition to the year one and two toilets, we were also asked to refurbish the year R toilets. This was-simpler task which included changing the toilets, cubicles and flooring. All pipework and cisterns were hidden behind easily accessible rear paneling. This tidies up the area and is easier to keep clean. We also added a new vanity unit which also hides all pipework and allows for easy cleaning.

The school was extremely happy with the final results and now have bright, clean open areas.

For similar projects that we carry out in schools please click on the following link to the education section of our website-https://www.wallerservices.com/schools-education-clients/

Waller Building and Glazing Services

In the last seven years, Waller Associates has worked in over 150 schools. Our reputation in the education sector is growing fast. Waller Building and Glazing is Fensa, Chas, Constructionline and Safecontractor registered.- Additionally, all of our staff are DBS certified. This means that our staff are suitable to work in schools. Furthermore we would be happy to price any maintenance or refurbishment works for your school.

Building Services We Provide In Schools

The building services we provide include smaller refurbishments through to extensions and new builds. We cover all the building as well as glazing services that a school would require. This includes, toilet and kitchen refurbishments. We also install fencing, flooring and carry out complete new builds. Check out our website case studies to see projects we have recently completed.

Glazing Services We Provide In Schools

We carry out works from window and hinge repairs through to complete aluminium and uPVC window and door installations.
