Technical College Window Replacement

Waller Glazing Services carried out this technical college window replacement after being successful in a tender process by AP Cost Consultants. The windows being replaced were the original Crittal windows and had reached the end of their effectiveness. The single glazed windows were replaced with aluminium, double glazed alternatives. The new windows have improved security as well as the thermal efficiency of the building which will help the lower the heating costs in the future. Additionally, the new windows enhance the look of the building.

Aluminium Doors

The existing aluminium doors were in good working order but looked out of place and dated compared to the new windows. As the doors were working well it didn't make sense to replace them with new aluminium doors. The solution was to spray the frames which is far, far cheaper but rejuvenated the doors and makes them look like new and match the windows.
