School Car Park Fencing

We installed the school car park fencing during as the existing wooden fence was becoming inadequate and breaking down in areas. Part of this was because of vegatation becoming overgrown and impacting on the fence line. We removed the fence and the overgrown trees and bushes to allow us to start installing the new fence. New metal palisade fencing was installed. This highly durable fencing is very common in schools and comes in a number of powder coated colours. It is ideal security fencing and can be seen in many commercial settings.

Installation During School Term Time

Due to our busy workload, we were unable to carry out the works during the school holidays. We discussed the possibility of installing the fence during term time and, as the works were not in an area of the school that the pupils had access to, the school was happy for us to do this. We created a fenced off area for the skip and ensured that the site was safe at all times. No tools or materials were left exposed or unmanned. In addition, all of our staff are fully DBS checked to ensure that the staff and pupils are safe.
