Primary School Refurbishment Works

We carried out these primary school refurbishment works during the school summer holidays. The works incorporated the refurb of a classroom, including alterations to the layout. We also transformed a toilet block into a new library area which created an extra light and open learning space. Additionally, two external toilets were added to assist the schools problem of pupils being able to gain access to toilets at lunch and break times. The toilets position provided an added benefit of pupils being able to use them during the school day.

Waller Building Services also refurbished boys and girls toilets to complete the holiday works. All of works were completed within a tight timescale which we managed to achieve with efficient project management. The school was extremely happy with the results and have asked us to carry out more works in the future.
