Classroom Window and Door Replacement

We carried out the classroom window and door replacement project for Boughton Monchelsea Primary School during the summer holidays. Three of their classrooms had the old Crittal style of single glazed windows and doors.

Why Upgrade the Windows and Doors?

There were several reasons why the school wanted to upgrade the windows and doors. Firstly, the new double glazed windows and doors would lower the school's carbon footprint. This is achieved with double glazing that retains heat more efficiently. This means that less energy is being used. Additionally, the new windows increase security due to a superior locking system and being glazed with safety glass. The new windows and doors also add a modern and contemporary look to the building bringing the classrooms in line with other parts of the school.

High Level Opening Windows

We installed a window winder system to ensure that staff can open the higher level windows safely and comfortably.
