Primary School's Toilet Refurbishment

We carried out Stone St Mary's C of E Primary School's toilet refurbishment project during the summer holidays. The school had five toilet blocks that had begun to look tired and past their best. From the outset, the school wanted to create a bright, colourful and welcoming environment. Each toilet block was completely refurbished. The works included new suspended ceilings, flooring, and new hygiene wall cladding. The benefit of the cladding is that it is a waterproof, easy clean, wipeable surface which means that it is easy to maintain.

New Door Sizes

Some of the existing toilet cubicle doors were full height which meant that if a young student had any problems, access by a member of staff to offer assistance was difficult. We replaced the doors with smaller doors in the year 1 toilet blocks which offers an easy access should there be any problems. Additionally the smaller doors and cubicles provide a lighter and more open fill to the toilets.

Colour

We were able to add lots of colour by installing bright coloured doors. Additionally the duct panels, which cover up the pipework at the rear of the toilets, were in matching colours. Finally, we installed vanity units with brightly coloured panels.

The school were very pleased with the transformation of the toilets.
