School Fencing and Entrance Gates

King Ethelbert School in Birchington asked us to install new school fencing and entrance gates to the the front of their site. We installed 64 metres of twin mesh security fencing and three automated gates at the school's main entrance. The main object was to make the school more secure. Six foot fencing was installed as well as two pedestrian gates and a set of two vechicle entrance gates. All three gates are automated and function via access control which can be operated from the reception office by using intercom points on the gates.

New Pathway

With the two additional pedestrian gates, the school also required a new pathway which was laid by ourseleves to ensure easy access to the school on foot.

Building Services We Provide In Schools

The building services we provide include smaller refurbishments through to extensions and new builds. The services we provide include anything that a school would require. This includes, toilet and kitchen refurbishments. We also install fencing, flooring and carry out complete new builds. Check out our website case studies to view projects that we have recently completed.

Glazing Services We Provide In Schools

In addition to building works, we also carry out works from window and hinge repairs through to complete aluminium and uPVC window and door installations.
