Hospital School Hall Refurbishment

A school that is located within a psychiatric hospital contacted us to carry out the complete refurbishment of a small sports hall facility. After several meetings, a design was produced which met the school's requirements. The project included additional bespoke storage for sports equipment and the installation of Sport England approved vinyl flooring, complete with line markings.

The whole area was enhanced fully by upgrading the lighting to LED and new electrics. Additionally the hall was decorated throughout which provided a fresh, clean feel.

Contract Management

Due to the location of the school, it was important that the project was suitably and sensitively managed at all times. This was achieved by working closely with the hospital school staff and following their guidelines as well as through project management by one of our contract managers and a skilled workforce.

The school was so pleased with the final result and the way that we worked with them that they have asked us to price for additional projects.
