New School Doors

Shoreham Village School asked us to install these new school doors which replaced their original wooden, single glazed doors. This project was a result of the government's energy efficiency fund. Every school in the country was awarded funding to improve the school's energy efficiency and lower their carbon footprint. There are many ways to improve the energy efficiency in schools including LED lighting, insulation and double glazed windows and doors.

Door Installation

The schools priority was to use the funding to replace seven old single glazed doors with new uPVC, double glazed upgrades. Double glazed glass and modern door materials mean that less heat is lost during the colder months which means that less energy is required to heat the school. Additionally, this means that the school will spend less money on heating in the future. As well as improved energy efficiency, security is also increased with safety glass and multi point locks.

Change of Use

Two of the doors were in classrooms and were not required because there was already fire exit doors within the two rooms. The school asked if we could install windows with panels beneath them instead as they still required additional ventilation during the summer months.

Building Services We Provide In Schools

The building services we provide include smaller refurbishments through to extensions and new builds. The services we provide include anything that a school would require. This includes, toilet and kitchen refurbishments. We also install fencing, flooring and carry out complete new builds. Check out our website case studies to view projects that we have recently completed.

Glazing Services We Provide In Schools

In addition to building works, we also carry out works from window and hinge repairs through to complete aluminium and uPVC window and door installations.

Contact Waller Building and Glazing Services

Based in Sittingbourne, Kent, we carry out works throughout the south east of England. If you would like a quotation on any size of building or glazing project please contact us. Telephone – 01795 424435. Additionally email mark@wallerservices.com
