Fulston Manor School Toilet Refurbishment

We carried out the Fulston Manor School toilet refurbishment during the school summer holidays. The school had two school house meeting areas which contained toilet blocks. The toilet blocks were both of an age and had seen better days.

Hales House Toilets

The Hales House area, on the ground floor, was the first to receive a full refurbishment. We started by ripping out the current male and female toilets and then removed the internal walls. A new layout was designed to take advantage of the current available area. A total of six cubicles were installed with each being completely self contained. The new toilets face towards the common area and are floor to ceiling high for privacy. Every cubicle is equiped with a toilet, sink and a hand dryer. In total, a number of six new cubicles were installed, three for girls, two for boys and an ambulant cubicle.

Cromers House Toilets and Office

We created a similar scenario on the first floor in the Cromers House area which was a slightly different due to having an additional office at the side of the toilet block. We removed the original toilets and office and changed the layout to incorporate an improved toilet and office design. The new office was constructed and designed to blend in with the common room. The new office contains double glazed windows with integrated blinds for privacy.
