St Nicholas Primary School Toilet Refurb

After working with this school on previous projects, they asked us to design a new layout for one of their toilet blocks. We provided them with plans to improve the size and accessibility of the toilets. The toilets were in need of modernizing and required an improved layout.

The Works

We completely ripped out the existing three cubicles and one urinal. In addition we removed two walls which allowed for more a more spacious area. With a larger area created we were able to instate four new cubicles and two double sink units. The reconfiguration also meant that all of the cubicles were in one place and a new door opening was created which meant improved accessibility for the students. Additionally, a new floor was laid as well as suspended ceiling and LED lighting which provide a bright and modern area.

Project Carried Out During School Term Time

Unfortunately we were fully booked throughout the school holidays. We spoke with the school management team suggesting that we carry out the works during term time. They were keen to have the toilets refurbished as soon as possible. We produced a full project plan and communicated with the school at all times. All of our staff and operatives hold fully enhanced DBS certificates which were produced in advance and upon arrival. Any excessive noise was kept to a minimum and these works were carried out before or after the school working day.

The final result was a spaceous, bright and modern looking washroom facility.
