School Security Improvements

The following school security improvements were carried out at Bobbing Village School in Sittingbourne. The measures were required after the school grounds were broken into and property was damaged.

Security CCTV Camera System

We upgraded the existing CCTV system which included a new vision monitor and interfaced hard drive. In addition, we also installed a further 4 cameras which provide complete cover of the school premises.

New Security Fencing

The school had fencing around the perimeter. However in some places, the fencing wasn't adequate in preventing unwanted visitors. The school requsted that we install high fencing along complete areas of the school's boundary. In total, we installed 265 metres of 2.4 metre high mesh, security fencing and 2 pedestrian gates

Anti-Climb Drainpipe Covers

Anti-climb drainpipe covers were installed on all of the school's downpipes. The anti-climb covers should prevent any unwanted visitors climbing up the drainpipes and gaining access to the roof.
