Borden Grammar School Toilet Refurbishment

The Borden Grammar School toilet refurbishment project was completed during the summer holidays, allowing for minimal disruption to students and staff. Having successfully partnered with the school on previous refurbishments, including earlier toilet block upgrades, the school was keen to continue the relationship and entrusted us with the refurbishment of two further toilet areas.

Scope of Works

The school required a full refurbishment of two toilet blocks. The project included:

- Complete strip-out of existing fittings
- Installation of new, durable flooring
- Fit-out of new toilet cubicles – **floor-to-ceiling height for maximum privacy**
- Removal of urinals and replacement with **additional cubicles**, in line with the school's hygiene and inclusivity policies

This approach, increasingly adopted by schools across the UK, reflects a growing awareness around student wellbeing and privacy.

Wash Station Installation

To maximise space and improve functionality, we replaced traditional sinks with a modern **6-person stainless steel wash station**. This feature has become a popular choice in educational settings where layout efficiency is a priority. The station was equipped with **pump-action soap dispensers**, offering a hygienic and low-maintenance solution for busy school environments.

Outcome

The refurbished toilet blocks have significantly improved the overall user experience for students. The project was completed on time and within budget during the school's summer break, ensuring a fresh, clean, and functional space was ready for the new term.

The school expressed satisfaction with both the quality of the work and the seamless delivery – a testament to the strength of our ongoing relationship and understanding of the specific needs within the education sector.

Key Features

Floor-to-ceiling cubicles for increased privacy

- Removal of urinals in favour of enclosed cubicles
- Space-saving stainless steel wash station
- Pump-action soap dispensers for hygiene and efficiency
- Completed during school holidays to avoid disruption
