Iwade School Toilet Refurbishment

-

Project Overview

We carried out the Iwade School toilet refurbishment project during the school summer holidays to upgrade two existing pupil toilet blocks. These facilities are not only used during the school day but also in the evenings during hall lettings, making durability and ease of maintenance key priorities.

Scope of Works

The project involved the complete refurbishment of the two toilet blocks. Our team began by fully stripping out the existing fittings and finishes, preparing the spaces for a high-spec modern installation tailored to the needs of a busy school environment.

Key works included:

- Installation of **new floor-to-ceiling toilet cubicles**, providing enhanced privacy and a modern look.
- Fitting of **new toilets with full-height back panels**, effectively concealing pipework and simplifying cleaning.
- Installation of **trough sinks**, ideal for high-traffic areas and quick handwashing.
- **New non-slip safety flooring** and **suspended ceilings** to brighten and modernise the space.

Hygiene Wall Cladding – The Final Touch

To complete the refurbishment, we installed **Whiterock hygiene cladding** to all wall surfaces. Increasingly popular in school settings, this cladding offers a **seamless, grout-free, watertight finish** that is both visually clean and highly practical.

Benefits include:

- **Easy cleaning** with no grout lines where bacteria can accumulate
- **Reduced odours** and damp thanks to the waterproof surface

High impact resistance, helping to protect the walls from damage

- **Long-term durability**, reducing the need for frequent maintenance

The result is a fresh, modern, and hygienic toilet environment that looks cleaner, lasts longer, and supports the school's commitment to pupil wellbeing and high standards of cleanliness.
